

PONGPHON SRIBOONRUENG

SOFTWARE ENGINEERING GRADUATED

56/1,Village No.3,Bo Kwang Thong Subdistrict,Bo Thong District,Chonburi Province 20270
• 080-772-4915
• pongphonsriboonrueng@gmail.com

SUMMARY

A motivated Software Engineering graduate with hands-on experience building, testing, and designing apps through coursework and capstone projects. Skilled in core programming, modern frameworks, and databases. I work well in agile teams, pick up new tech quickly, and love solving problems. Excited to bring practical skills to the team and help build great software

WORK EXPERIENCE

Full stack developer Internship | Exvention Co., Ltd. **December 2025 - March 2026**
Thiangtrong Application Project

- Led end-to-end UX/UI design with Figma and Draw.io, turning complex business needs into intuitive screens, wireframes, and tested user flows tailored for an admin dashboard.
- Built and architected the frontend for the main site and Admin Dashboard using React, Next.js, TypeScript, and MUI—integrating APIs and state management for real-time data, filters, and dynamic charts.
- Refactored codebase for peak performance, streamlining rendering speeds and maintaining consistent UI styles and maintainable code across the platform.

Front-end developer Internship | Exvention Co., Ltd. **June 2025 - September 2025**
VMS Management Project

- Led UI/UX design for a traffic management SaaS and VMS control system for the Department of Rural Roads, working with stakeholders to turn complex operational needs into clear system workflows.
- Designed wireframes and interactive prototypes in Figma, tailoring dashboard interfaces for operators to efficiently track real-time, AI-detected road incidents.
- Streamlined the overall UX for fast incident response, minimizing navigation friction to help operators spot road anomalies and make quick, timely decisions.

UX/UI Internship | Exvention Co., Ltd. **June 2024 - March 2025**
Equipment System - ERP Project

- Partnered with Exvention Company to deliver an office equipment checkout system, designing the full UX/UI in Figma with intuitive user flows and component libraries to simplify equipment requests and approvals.
- Built and launched responsive web pages using React and Tailwind CSS, ensuring high performance, fast load times, and a seamless user experience across both desktop and mobile devices.
- Executed comprehensive functional and integration testing, creating detailed test cases to eliminate bugs, validate multi-user workflows, and ensure reliable system stability.

EDUCATION

Faculty of Informatics (Software Engineering major)
Burapha University | June 2022 – March 2026

- GPA: 2.82

AWARDS & CERTIFICATIONS

Certificate in Open Source Software Developers Camp
Faculty of Informatics, Burapha University | April 2024

- Completed an intensive software training boot camp, building hands-on skills with open-source tools and team collaboration workflows.

Award in Open Source Software Developers Camp - Website System Design
Open Source Software Developers Camp #12 (OSSD Camp) | April 2024

- Awarded for outstanding system design during the camp, building a fast, scalable web architecture with clean logic and solid structure.

RELEVANT PROJECTS & ACTIVITIES

Individual Presenter **November 2025**
Software Engineering Seminar Course

- Researched and presented an IEEE paper on "UI/UX for Generative AI," breaking down complex AI design frameworks and taxonomies into clear, actionable takeaways for peers.
- Analyzed modern trends and design challenges in AI-driven systems, highlighting practical roadblocks, emerging solutions, and real-world UX best practices.

Online communication system using RabbitMQ/RabbitLink **October 2024**
System Admin Course

- Built a full-stack real-time communication system using Node.js, Express, and RabbitMQ to handle asynchronous message queuing and reliable backend routing.
- Developed interactive React interfaces with WebSockets to show live message flows and status updates, running end-to-end integration tests to ensure data accuracy and rock-solid stability.

Online Exhibition Of Informatics Students **April 2024**
Open Source Software Developers Camp #12 (OSSD Camp)

- Handled end-to-end UX/UI design and modern frontend development, creating wireframes, interactive prototypes, and responsive web pages tailored for seamless use by both students and administrators.
- Translated academic needs into clear technical specs and ran full system tests, writing comprehensive test cases to catch bugs and guarantee reliable platform stability and data accuracy.

CORE SKILLS

Programming Languages JavaScript, TypeScript, Java, Python, C, PHP

Data & Message Broker MySQL, Oracle, RabbitMQ

IT Infrastructure & Maintenance Hardware/Software Diagnostics, System Configuration, Network Troubleshooting, Preventative Maintenance

Frontend Technologies React, Next.js, HTML5, CSS3, Tailwind CSS, Flutter

Backend Technologies Node.js, Express, Laravel, RESTful APIs

Tools & Platforms Word, Excel, Powerpoin, Canva, SAP, Jira, Monday, Git, GitHub, Figma, XAMPP, Capcut, Adobe
